Special Issue

Personalized Management and Treatment in Geriatrics

Message from the Guest Editors

This Special Issue aims at exploring the latest developments in personalized management and therapy for older adults. We seek to highlight novel methodologies in patient assessment, diagnostics, treatment customization, and holistic care models, ensuring that geriatric medicine evolves to meet the demands of an aging population. Our focus spans pharmaceutical adaptations, non-pharmacological interventions, predictive analytics, and policy implications for personalized healthcare. In addition, patient-centred models of care and prevention strategies designed to improve quality of life and promote autonomy are explored. This collection will showcase pioneering research in geriatrics, from discovering biomarkers in ageing, modelling diagnostic tools to individualized drug regimens (including AI-driven) and integrated care frameworks. We welcome contributions detailing real-world applications, clinical trials, and interdisciplinary collaborations that push the boundaries of geriatric treatment paradigms.

Guest Editors

Dr. Carmen da Casa

Faculty of Health Sciences, Pontifical University of Salamanca, 37002 Salamanca, Spain

Prof. Dr. Juan F. Blanco

1. Orthopaedic Surgery and Traumatology (Lead), University Hospital of Salamanca, Salamanca, Spain
2. Orthopaedic Surgery and Traumatology, Surgery Department, University of Salamanca (USAL), Salamanca, Spain
3. Instituto de Investigación Biomédica de Salamanca (IBSAL), Salamanca, Spain

Deadline for manuscript submissions

20 February 2026

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker
Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:
indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:
CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
