COVID-19: Current Understanding of Its Pathophysiology, Clinical Presentation and Treatment

Message from the Guest Editors

Since December 2019, there has been an outbreak of coronavirus-2 (CoV-2) disease (COVID-19), responsible for a severe acute respiratory syndrome, often requiring hospital admission for ventilatory and medical support. Investigation of COVID-19 characteristics and outcomes has resulted in an increasing awareness and fast-growing knowledge about the management of the disease. This Special Issues of *Journal of Personalized Medicine* aims to update the current evidence and collect the latest findings on COVID19 pathophysiology. Particular attention will be paid to original research articles and state-of-the-art reviews focused on COVID-19 clinical presentation, pathophysiology, and therapeutic approaches.
