

## Special Issue

# Intersections between Kidneys and Cardiovascular System: Personalized Management

### Message from the Guest Editors

The kidney plays a central role in the normal physiologic regulation of our cardiovascular system through not only the removal of waste products, but also intrinsic regulatory systems that maintain homeostatic blood volume, blood pressure, and tissue perfusion, including the maintenance of fluid volume and sodium balance. As such, injury to the kidney has wide-ranging implications for cardiovascular health. This Special Issue is dedicated to improving our understanding of the unique cross-talk between the kidneys and cardiovascular system in both homeostatic and pathophysiologic settings and the implications of this research for public health. Thus, in addition to the basic science to clinical translational work that is fundamental to uncovering the complex relationship between the kidneys and cardiovascular system, we are interested in highlighting the related dissemination and implementation science efforts aimed at fostering evidence-based practices, interventions, and policies that can effectively reduce the significant morbidity and mortality associated with cardio-renal impairment.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

---

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
