Skin Cancers: Update on Personalized Treatment and Management

Message from the Guest Editor

Skin cancers, including basal cell carcinoma, squamous cell carcinoma, and melanoma, have continued to rise globally over the past few decades, and statistics have shown that skin cancer is one of the three most common forms of cancer. Fortunately, novel, more effective treatments for various types of skin cancer are in development, and early diagnosis and the exploration of innovative treatments are particularly important. This Special Issue will focus on recent advances in skin cancer prevention, diagnosis, and treatment and the latest insights gained by clinical researchers, with a focus on how to personalize these new advances in clinical practice.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
