Emergency Medicine: Updates on Personalized Diagnosis, Treatment, and Management

Message from the Guest Editor

The world of emergency medicine is undergoing a major reorganization and is facing new challenges in increasingly crowded hospitals by honing skills for the recognition and treatment of critical conditions of increasingly complex patients. It is necessary to analyze this system and its critical aspects in order to rethink its structure and function. It is necessary to accept that different types of emergencies may need to be managed individually. In this scenario, it will be necessary to design new systems that recognize and treat general acute health situations, as well as those that will become more frequent, such as in instances of unrecognized geriatric health problems. It will also be essential to establish optimal diagnostic and therapeutic pathways for both acute and rare diseases.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
