

## Special Issue

# Laparoscopy, Perioperative Care and Complications in Surgery for Gastrointestinal Diseases

### Message from the Guest Editor

Minimally invasive surgery has revolutionized the therapeutic landscape by reducing patient morbidity, shortening hospital stays, and expediting recovery times. Over the last 20 years, perioperative care in upper gastrointestinal, colorectal, and hepatobiliary surgery has also significantly evolved, markedly improving clinical outcomes for patients undergoing surgical interventions. The use of these advancements is integral to mitigating surgical risks, managing postoperative complications, and promoting patient-centered care. This Special Issue aims to explore the nuanced roles of minimally invasive techniques and modern perioperative care in the treatment of both benign and malignant gastrointestinal diseases. Studies on surgical techniques, improvements in clinical practice, the application of cutting-edge technology, and perioperative management are also within the scope of this Special Issue. By sharing innovative research and clinical experiences, this Special Issue will serve as a comprehensive resource that advances our collective understanding and fosters continued progress in the surgical management of gastrointestinal diseases.

### Guest Editor

Dr. Michał Kisielewski

Chair of Surgery, Faculty of Medicine and Health Sciences, Andrzej Frycz Modrzewski Krakow University, 30-705 Krakow, Poland

### Deadline for manuscript submissions

25 December 2025

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
