Special Issue

Personalized Diagnosis, Treatment, and Prognosis of Gastrointestinal Oncology

Message from the Guest Editor

Cancers in digestive organs represent the most common malignant diseases, and they pose a major challenge to global public health. Although patients diagnosed with localized cancers can be treated with curable intent, tumor recurrence can occur at high rates. For patients with advanced unresectable or metastatic diseases, systemic treatment and/or palliative care remain the only options. Due to tumor heterogeneity among patients and between tumor sites in the same patient, the possibility of adopting effective personalized medicine for all patients remains a highly unmet need. As translational research has led to significant advances in screening and patient management, the individualized diagnosis, treatment, and prognosis of gastrointestinal tumors have become important clinical and research focuses. This Special Issue of *Journal of Personalized Medicine* focuses on the screening, early detection, diagnosis, prevention, and clinical investigation of gastrointestinal cancer, including but not limited to multi-modality therapy, markers, imaging, and tumor biology.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker
Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:
indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:
CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
