Special Issue

Update and Perspectives on Corneal Diseases

Message from the Guest Editor

The cornea is not only the outmost layer of the eyeball, but it also transmits the light essential for vision, giving focus to images. Recent medical and technological innovations have improved cornea diagnosis and contributed to the variety of treatments available. This Special Issue of the *Journal of Personalized Medicine* aims to explore updates and perspectives on all kinds of ocular surface diseases, such as keratitis, corneal neovascularization/lymphangiogenesis, dry eye, pterygium, ocular surface related surgery, etc. We are pleased to invite you to contribute studies that use basic science, clinical, and population-based approaches, including, but not limited to, mechanism research, diagnosis, and therapy. Original research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
