Personalized Urologic Surgery: Innovation and Strategies

Message from the Guest Editors

In recent decades, there have been extensive developments in the surgical management of benign and malignant urinary pathologies. Novel treatment approaches are gaining traction, and more and more mature results are underlining the relevance of minimally-invasiveness in any kind of urological surgery. Robotic platform diffusion, single-port access, extraperitoneal approaches, digital endourology, and lasers improvements are changing scenarios in cancers and in stone management. Artificial intelligence will provide information and integrate surgical procedures and therapy planning. Moreover, quality of life, precise surgical patient selection, and early recovery have similarly gained popularity in clinical practice, with a renewed focus on personalized and tailored interventions to reduce morbidity and improve quality of life. Finally, new insights derived from newer systemic therapies and stereotactic treatment are completing our understanding of surgical procedures. This Special Issue presents an up-to-date platform to underline the relevance of patient-centered personalized management from a preoperative to intraoperative and postoperative point of view.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
