

## Special Issue

# Personalized Urologic Surgery: Innovation and Strategies

### Message from the Guest Editors

In recent decades, there have been extensive developments in the surgical management of benign and malignant urinary pathologies. Novel treatment approaches are gaining traction, and more and more mature results are underlining the relevance of minimally-invasive in any kind of urological surgery. Robotic platform diffusion, single-port access, extraperitoneal approaches, digital endourology, and lasers improvements are changing scenarios in cancers and in stone management. Artificial intelligence will provide information and integrate surgical procedures and therapy planning. Moreover, quality of life, precise surgical patient selection, and early recovery have similarly gained popularity in clinical practice, with a renewed focus on personalized and tailored interventions to reduce morbidity and improve quality of life. Finally, new insights derived from newer systemic therapies and stereotactic treatment are completing our understanding of surgical procedures. This Special Issue presents an up-to-date platform to underline the relevance of patient-centered personalized management from a preoperative to intraoperative and postoperative point of view.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
