

Special Issue

Advances in Personalized Cosmetic and Restorative Dentistry

Message from the Guest Editors

Welcome to this Special Issue, which focuses on the latest advancements in personalized cosmetic and restorative dentistry. In recent years, this field has seen remarkable growth, driven by innovative technologies and evolving techniques that enhance both the functionality and esthetics of dental care. Today, practitioners are equipped not only with advanced materials but also with digital tools that enable a more precise, patient-centered approach.

In particular, we explore how these advancements are shaping outcomes in patient satisfaction and contributing to more sustainable, long-lasting results. Whether through direct bonding techniques, such as the refinement of CAD/CAM systems, or improved implant options, the opportunities to restore health and confidence to patients have never been more promising.

We invite researchers to contribute original articles in the mentioned fields, in the form of clinical research, systematic reviews, meta-analyses, and related formats. We hope that this collection will serve as a valuable resource and inspires ongoing dialogue in this dynamic field, encouraging continuous progress for the benefit of patients and professionals alike.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
