

## Special Issue

# Recent Advances in Personalized Medicine

### Message from the Guest Editor

To establish Journal of Personalized Medicine as a journal with high standards that attracts top quality research, the first issue published in this journal is of utmost importance. We plan to publish a collection of papers that nicely demonstrate the broadness of the field and in this way underscore the focus and scope of the journal. We invite you to suggest a title that highlights the personalized medicine aspects of your field of research.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.
