

Special Issue

Long-term Cancer Survivorship

Message from the Guest Editor

Cancer is a complex disease. Because of successes in screening, early detection, and individualized oncology treatments, cancer is increasingly seen as a chronic condition. Both acute treatment and long-term management require the dedication of a multidisciplinary team of clinicians and researchers, as well as continuing patient engagement and empowerment. This Special Issue on survivorship focuses on the long-term aspects of living with cancer, and covers a time period from diagnosis, through treatment, and into the years beyond. Topics span biopsychosocial factors, the self-management of symptoms and co-morbidities, lifestyle changes, future survivorship risks, and considerations at the individual, family, and health system levels.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
