# **Special Issue**

# **Long-term Cancer Survivorship**

## Message from the Guest Editor

Cancer is a complex disease. Because of successes in screening, early detection, and individualized oncology treatments, cancer is increasingly seen as a chronic condition. Both acute treatment and long-term management require the dedication of a multidisciplinary team of clinicians and researchers, as well as continuing patient engagement and empowerment. This Special Issue on survivorship focuses on the long-term aspects of living with cancer, and covers a time period from diagnosis, through treatment, and into the years beyond. Topics span biopsychosocial factors, the self-management of symptoms and co-morbidities, lifestyle changes, future survivorship risks, and considerations at the individual, family, and health system levels.

# About the Journal

## Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Editor-in-Chief

### Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, PubMed, PMC, Embase, and other databases.

### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
