Frontiers in Pathogenesis and Therapeutics of Cancer

Message from the Guest Editors

In cancer treatment, the ultimate goal is to offer accurate and personalized treatment according to the specific situation of patients. This Special Issue of the Journal of Personalized Medicine aims to explore the latest innovative treatments for all kinds of cancers, such as breast cancer, leukemia, endometrial carcinoma, and so on. Our goal is to demonstrate the scientific advances in this field and pave the way toward personalized medicine for treating cancers. In this Special Issue, original research articles and reviews are welcome. We are pleased to invite you to contribute studies using basic science, clinical, and population-based approaches, including, but not limited to:

radiotherapy

chemotherapy

immunotherapy

CART

immunotherapy

targeted therapy

cell therapy
