

## Special Issue

# Cardiovascular Diseases— From Risk Factors to Diagnosis and Personalized Management

### Message from the Guest Editors

This Special Issue of the *JPM* will highlight the current state of the art and show# case some of the latest findings in the field of heart diseases, with a main focus on coronary artery disease, microcirculation, as well as all types of heart failure. This involves the evaluation of non-invasive and invasive diagnostic tools, biomarkers, expanded advanced risk factor analysis, risk scoring systems, cardiovascular genetics, gene expression testing, as well as research and debate about the prevention and treatment, especially focused on individualized approaches. This Special Issue aims to provide researchers with an opportunity to publish both original research and review articles related to recent advances in coronary artery disease and heart failure, with a particular focus on holistic and personalized management as well as novel diagnostic, treatment, and prevention strategies using an interdisciplinary approach involving chemical, biological, physiological, pharmacological, physicochemical, and psychological perspectives.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
