Care Personalization in Parkinson Disease

Message from the Guest Editor

Parkinson's disease (PD) is a progressive non-curable neurodegenerative disorder with an age of onset usually over 60 and presenting with complex motor and non-motor features. The incidence of PD increases with age and is expected to double by 2030 worldwide. The intrinsic complexity of care in PD (such as many neurodegenerative conditions) requires the involvement of different healthcare professionals. Multispecialty care organization is an intuitive process to address this complexity and personalize care for people living with PD.

This Special Issue of the Journal of Personalized Medicine aims to describe the current state of the art of patient-centered care for PD with a particular emphasis on 1. innovative care integration efforts, 2. patient-centered strategies for the development of care delivery models, 3. self-management support and self-care, and 4. development of digital health technology enablers of care personalization in PD. In this Special Issue, we will consider reviews, viewpoints of novel and transformative concepts, and original research.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
