

Special Issue

Bringing Personalized Medicine into Clinical Practice 2013

Message from the Guest Editor

The concepts of personalized medicine have been around for decades, but in the 10 years following the full sequencing of the human genome there has been an explosion of research into methods and tools to further personalize patient care. Some of these, particularly in the field of oncology, have been readily adopted into clinical practice; but most have yet to be integrated into mainstream clinical care. This issue of the Journal of Personalized Medicine will highlight research that is leading the way in bringing Personalized Medicine tools, including risk stratification, family health history, genetics, or genomics, into the clinic. These studies should present data related to important concepts such as adoption barriers and solutions, education, and/or implementation to promote dissemination and broad uptake of these tools.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
