Effects of COVID-19 on Humans: A Study of Sequelae

Message from the Guest Editors

The challenges that we have faced so far during the COVID-19 pandemic have been unprecedented. The integration of translational and clinical research using cutting-edge laboratory techniques to study patient samples and quickly pivot laboratory discoveries into new therapies for our patients has been key to meeting these challenges. All COVID-19 and post-COVID-19-related research are critical to reaching our ultimate goal of designing new diagnostic tests, understanding the underlying mechanisms of disease processes, and establishing, improving, and advancing therapies. These discoveries help us understand, using an individual approach, patients suffering from long-COVID symptoms, identify their risk factors, and establish specific measures that improve health and performance. This Special Issue aims to highlight the current state of the science and showcase some of the latest findings in the field of the sequelae of COVID-19. Therefore, all studies using basic science, clinical and population-based approaches are welcomed. The scientific advances in the field of long-COVID will continue to pave the path towards personalized care for optimal health and wellness.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
