

Special Issue

Human Cytochrome P450 and Personalized Medicine

Message from the Guest Editors

It is our pleasure to invite you to contribute to a Special Issue of the *JPM* (IF 4.945) entitled Human CYP450s and Personalized Medicine. We provide you with this invitation as we know you are an expert in the field, and believe that you could contribute a significant paper to this Issue, which can hopefully be published as a book. A regular peer-review process will be in place, and you will receive comments following your submission. As a high-impact journal, publication is therefore not guaranteed. Our objective is to have several publications covering the impact of variant alleles of various CYP450 isoforms on the pharmacokinetics, pharmacodynamics and patient outcomes associated with numerous medications. Hopefully, we will have publications covering at least *CYP1A2*, *CYP2B6*, *CYP2C9*, *CYP2C19*, *CYP2D6*, *CYP2E1*, *CYP2J2*, *CYP3A4/5* and *CYP4F2*. More than one paper for each isoform would be acceptable if they address conditions associated with different drugs. We urge you to let us know your topic of interest by submitting a title and a short abstract of the proposed publication (150 words). The deadline for submitting your work, either review or original article, is June 2022.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
