

## Special Issue

# Molecular Diagnosis and New Therapeutic Approach of Oral Diseases

### Message from the Guest Editors

Oral health is now recognized as an important sentinel element for the preservation and maintenance of general health, and the study of genomics, proteomics, and metabolomics (among the various involved sciences) seems to be one of the most important factors in gaining new knowledge in the field of personalized dental medicine. All the abovementioned elements, along with the effects of the microbiome and the importance of its balance, for the development of preventive and therapeutic strategies to face oral diseases, constitute the essential framework of this Special Issue. The aim of this Special Issue is to provide insight into recent advances in the field of personalized dental medicine. Potential topics in this Special Issue include but are not limited to in-vitro and clinical research on genetics, oral health, oral pathology, oral surgery, and oral microbiology. Studies incorporating a new approach or providing novel information are high-priority. Systematic and narrative reviews in the field of dentistry focusing mainly on infectious disease are also welcome. It is our pleasure to invite you to contribute to this Special Issue.

### Guest Editors

Prof. Dr. Gaetano Isola

Department of General Surgery and Surgical-Medical Specialties,  
University of Catania, Catania, Italy

Dr. Romeo Patini

Department of Head, Neck and Sense Organs, Catholic University of  
the Sacred Heart, 00168 Rome, Italy

### Deadline for manuscript submissions

closed (20 September 2021)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
