

Special Issue

Upper Digestive Surgical Oncology

Message from the Guest Editors

We are honored to guest edit a Special Issue regarding the surgical oncology of the upper digestive system. While many systemic therapies have been prospectively developed for malignancies of the upper digestive system, there is still a great number of unmet needs in the field of surgical oncology. Radical surgical resection remains the cornerstone treatment for cancers of the upper digestive system. In this issue, we cordially invite all researchers to contribute relevant clinical and basic studies regarding upper digestive cancers including esophagus, stomach, small intestine, liver, biliary tract, and pancreas. Studies on surgical technique, improvement of clinical practice, application of cutting-edge technology, and perioperative management are also in the scope of this Special Issue. Original and review articles (systematic and narrative approaches) are also welcome. Papers that meet the criteria of the peer-reviewed process will be accepted for publication. We hope that this Special Issue will enrich our knowledge of upper digestive surgical oncology and further improve the quality of cancer patient care in surgery.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
