Advanced Research in Glaucoma: Treatment and Postoperative Approaches

Message from the Guest Editor

Treatment goals for glaucoma have focused almost exclusively on lowering intraocular pressure (IOP) using drugs, laser therapy, or surgery. Surgery should be considered whenever medical or laser treatment is unlikely to maintain sight in the glaucomatous eye. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current treatment of glaucoma. It is important to investigate both the safety and the efficacy of IOP-lowering medication, laser surgery, or incisional surgery. I am confident that the results of such studies will be beneficial not only for glaucoma patients but also for physicians. The accumulation of these results will improve the quality of life in patients with glaucoma.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
