Implementing Personalized Medicine in a Large Health Care System

Message from the Guest Editor

Dear colleagues, Partners Health Care has over 60,000 employees including over 10,000 physicians and sees 4 million patients on an annual basis, making it the largest health care system in Massachusetts and one of the largest academic medical centers in the US.

Personalized medicine is a Department of Partners Health Care that is responsible for enabling the use of genomics to subset patients for the best possible treatments. The Department also works to develop its solutions for Partners eCARE our electronic medical record and we provide core services to investigators to enhance research in personalized medicine. This issue of *JPM* will detail a variety of initiatives across Partners that are aimed at advancing the care of our patients with the most advanced genomic technologies.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
