Chronic Kidney Disease: Early Detection, Mechanisms, and Therapeutic Implications

Message from the Guest Editor

Chronic kidney disease (CKD) is an important and common noncommunicable condition globally. CKD is defined and staged according to measures of kidney function that allow for a degree of risk stratification using commonly available markers. The early detection of those at risk of developing CKD is necessary as the number of patients is increasing steadily worldwide. In this Special Issue, we welcome original papers and review articles focusing on the early detection of chronic kidney disease, e.g., development of novel biomarkers. In addition, manuscripts investigating the underlying mechanisms of CKD and potential novel therapeutic implications are also invited.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
