Pathophysiology and Treatment of Secondary Conditions after Spinal Cord Injury

Message from the Guest Editors

The spinal cord is the central nervous system's conduit from the brain to the rest of the body and translates sensory and motor information to and from the brain as well as autonomic and peripheral nervous systems. Spinal cord injury (SCI) can have devastating effects on sensory and motor neurological function as well as autonomic processes on cardiovascular, pulmonary, gastrointestinal, genitourinary, musculoskeletal, hematological, endocrine, and integumentary systems, creating profound psychosocial and spiritual dilemmas. This Special Issue will address the pathophysiology and treatment of secondary conditions associated with SCI.

Guest Editors

Prof. Dr. David R. Gater
Dr. B. Jenny Kiratli
Dr. Gary J. Farkas

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
