Special Issue

Individual Evaluation, Management and Outcome in Perioperative Medicine

Message from the Guest Editors

Perioperative medicine is a clinical area related to the perioperative management of anesthetic and surgical patients. Optimal perioperative management is essential to reduce the risk of perioperative morbidity or mortality. The aim of this Special Issue of the *Journal of Personalized Medicine* is to provide a comprehensive overview regarding individual evaluation, management, and outcome in perioperative medicine. Areas to be covered in this Special Issue may include, but are not limited to: preoperative anesthetic and surgical risk evaluation, intraoperative monitoring and management, and postoperative anesthetic and surgical outcome evaluation. In this Special Issue, we welcome the submission of both original research and review articles targeting any of these topics.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
