

## Special Issue

# Novel and Personalized Treatment Concepts in Gynecologic Cancer

### Message from the Guest Editors

The field of gynecologic oncology has evolved greatly within the last years. The introduction of molecular analysis has changed the way we classify endometrial and epithelial ovarian cancers. Moreover, surgical treatment concepts have developed due to the introduction of the sentinel lymph node technique, allowing us to spare patients from unnecessary morbidities. Finally, predictive biomarkers such as BRCA mutations, homologous recombination deficiency, and microsatellite instability have revolutionized the treatment of a variety of gynecologic malignancies. In the precision medicine era, the further understanding of cancer genomics and the identification of predictive biomarkers are essential to achieve better health outcomes for women with gynecologic cancer. In this Special Issue, we aim to cover highly innovative findings and concepts within the field of gynecologic oncology, ranging from diagnostics to therapeutic approaches, that could improve the way we diagnose, classify, and/or treat gynecologic malignancies. A special focus will be precision medicine using molecular approaches and targeted treatments including Immunotherapy.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

---

### Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

---

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
