## Personalized Radiotherapy

### Message from the Guest Editors

Radiotherapy is one of the main methods of cancer treatment. Since the introduction of radiotherapy treatment, radiation oncologists and medical physicists have adapted radiation beam parameters to tumour size, shape, and localization in the body willing to eliminate cancer and keep healthy organs intact. Biologists have contributed significantly, providing knowledge on tumour and normal tissue sensitivity and factors influencing their response to radiation. The advancement in science, developments in technology, and increasing clinical evidence today allow to tailor treatment to each patient. Today, we adapt therapy to tumour properties, its morphology (dominant lesions) and metabolic properties, with emphasis on genetic factors and the underlying immunological status. We also try to reduce low doses, which occur in peripheral organs. We welcome papers dealing with all aspects aimed to widen the knowledge on the tumour and healthy organ response to radiation in concomitance to other anticancer treatments or pre-existing factors. In particular, we invite papers focusing on radiotherapy individualization, leading to better results and improved patient comfort and safety.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
