

Special Issue

Good Clinical Practice in Plastic Surgery

Message from the Guest Editors

Plastic surgery is a very individualized specialty. More so than in other fields, the quality of the operation depends on the experience and technical skill of the surgeon.

While many treatments are standardized, the potential surgical paths a surgeon may choose for an operation, and thus the outcome, vary. Furthermore, prospective randomized studies to improve patient care are hardly possible in the plastic surgery field due to structural, financial and surgical reasons. Therefore, to improve patients' wellbeing and quality of life, for this Special Issue, we are inviting the submission of papers based on individual's experiences and surgical tricks that have proven to be successful. We are particularly interested in experiences of good clinical practice in plastic surgery. Both reconstructive issues as well as aesthetic techniques are welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
