

## Special Issue

# Recent Advances in Precision Psychiatry

### Message from the Guest Editors

In the 21st century, medicine has advanced to the era of precision medicine. The goals of precision medicine are to find the patient-specific etiology, understand the unique pathophysiology, and tailor treatment for every patient. Psychiatry is no exception. Every psychiatric patient is unique in the context of their biopsychosocial and spiritual perspectives. Precision medicine is most suitable and desirable in the field of psychiatry. The recent advances in genomics, functional genomics, pharmacogenomics, brain imaging, electrophysiology, stem cell biology, and genome editing, to name a few, have greatly facilitated advances in the etiological diagnosis, pathogenesis elucidation, treatment regimen optimization, and new therapy development of psychiatric disorders. This new frontier of precision psychiatry comes with many challenges, and it is also a daring adventure involving insightful and surprising discoveries. In this Special Issue, we will showcase some exciting and excellent research findings that move psychiatry to the area of precision psychiatry. We sincerely invite you to contribute your important research findings to this Special Issue.

### Guest Editors

Prof. Dr. Chia-Hsiang Chen

1. Department of Psychiatry, Chang Gung Memorial Hospital-Linkou, Taoyuan 333, Taiwan
2. Department and Institute of Biomedical Sciences, College of Medicine, Chang Gung University, Taoyuan 333, Taiwan

Prof. Dr. Yu-Shu Huang

1. Department of Child Psychiatry, Sleep Center, Chang Gung Memorial Hospital-Linkou, Taoyuan 333, Taiwan
2. School of Medicine, College of Medicine, Chang Gung University, Taoyuan 333, Taiwan

### Deadline for manuscript submissions

closed (10 July 2023)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
