

## Special Issue

# Pregnancy Complication and Precision Medicine

### Message from the Guest Editors

Precision medicine represents a bold research area with the potential to revolutionize the way we approach and treat diseases. Precision medicine enables the specific delivery of therapeutic agents to cells and organs of interest, thus improving treatment outcomes and reducing side effects. In the obstetric field, several opportunities exist for existing diagnostic and treatment tools as well as for the development of innovative strategies that are driven by multiple factors, including fetal-growth restriction, preterm birth, and fetal abnormalities. Topics include (but are not limited to) the following:

- Drug targeting and nanotechnology and integration with individualized therapy;
- Omics-based studies of disease risk, disease prognosis, and response to therapy or prediction-based drug safety;
- Biomarker identification and application;
- Pharmacogenomics - genetics, and biochemistry of drug uptake, action, and metabolism;
- Advancements in Technologies and Resources;
- Regulation and bioethics in personalized medicine in obstetrics and gynecology.

, MD PhD

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
