

## Special Issue

# Psoriasis: Pathology, Clinical Presentation, and Treatment

### Message from the Guest Editor

Psoriasis is a chronic immune-mediated inflammatory skin disease with a prevalence of 2–3% worldwide. Psoriasis is described as multifactorial disorder in which environmental and genetic/epigenetic factors are likely to influence the susceptibility to the disease. Despite the identification of different etiopathogenetic mechanisms involved in the onset and progression of the disease, many pieces are still missing to obtain a complete knowledge of this disease. On this subject, the identification of new biomarkers (preclinical, clinical, genomic, epigenomic, pharmacogenomic) and the possibility of applying precision medicine protocols to psoriasis could improve patients' healthcare by providing the optimal therapeutic strategy and reducing the disease progression. In fact, precision medicine protocols will aim to optimize diagnostic procedures, treatment options, and the development of new therapeutic strategies. This Special Issue aims to highlight the role of personalized medicine in clinical practice, providing a complete overview of the disease and highlighting its critical issues in its management.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
