

Special Issue

Systems Radiology and Personalized Medicine

Message from the Guest Editors

Background: Many diseases and pathophysiological processes cross organ borders. Aim and scope: This Special Issue looks for articles that show the strengths and weaknesses of structural and functional whole-body imaging for personalized medicine. History: Medicine has evolved into a high level of specialization using very detailed imaging of organs. This has solved impressively health-related problems linked to many acute single-organ diseases. However, the organ-based approach is challenging when considering disease prevention and caring for patients with systemic diseases or multiple co-morbidities. Cutting-edge researches: Systems Medicine; Artificial intelligence; Cross-sectional imaging; Well-being and staying healthy; Chronic disease and aging. For this Special Issue, we are looking for papers that use quantitative (whole-body) imaging for personalized medicine to treat systemic diseases in humans.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
