# Personalized Care and Treatment Compliance in Chronic Conditions

## Message from the Guest Editors

Chronic diseases such as diabetes, cancer, cardiovascular and neurodegenerative diseases are growing at an alarming rate, especially in the aging population. These patients have different disease statuses and management requirements, so providing personalized care is key.

We aim to publish articles describing a personalized care approach to the diagnosis and treatment to chronically ill patients.

Personalised care is a collaborative process that should be used in chronic condition management in which patients, caregivers and healthcare providers identify and discuss problems caused by or related to the patient's condition, and then develop plans and goals to empower patients.

Personalized care can improve aspects of physical health, mental health and the ability to self-manage conditions. Thus, a personalized care approach could greatly benefit patients with chronic conditions. We encourage the submission of manuscripts that describe a personalized care approach to the diagnosis and treatment to chronically ill patients.

# About the Journal

## Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Editor-in-Chief

### Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, PubMed, PMC, Embase, and other databases.

### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
