Message from the Guest Editors

The Belt and Road is a development strategy and framework consisting of two main components, the land-based "Silk Road Economic Belt" and oceangoing "Maritime Silk Road". It will fully rely on the existing dual and multilateral mechanisms of China and relevant countries, and with the help of existing and effective regional cooperation platforms, the Belt and Road Initiative aims to borrow the historical symbols of the ancient Silk Road, hold high the banner of peaceful development, and actively develop the economic partnerships of countries along the line as they work together to create a community of interests, a community of destiny and a community of responsibility for political mutual trust, economic integration, and cultural inclusion.

This Special Issue welcomes submissions from all areas of finance and risk management, with a focus on big data management risks, competitive risk, credit risk, debt default risk, investment return risk, investment security risk, market risk, operational risk, risk analysis, risk modelling, and project risk management. This Special Issue not only has very good practical significance, but can also provide reference for future related research.
