### Message from the Guest Editor

This Special Issue aims to look at new and emerging challenges to be considered and addressed in Corporate Reporting from different points of view. We invite manuscripts featuring original research that complements our understanding of the impact of new and future challenges on companies that might be disclosed to enhance the entity's accountability and the trust of third parties.

We call for manuscripts that deal with all aspects of corporate reporting, including financial and nonfinancial issues, the impact of corporate governance mechanisms and governance reforms on the compliance with financial reporting standards and nonfinancial reporting references, the assurance of corporate reports, the quality and quantity of mandatory or voluntary corporate disclosure, the readability and utility of corporate reports, and impression management. Here, “nonfinancial reporting” refers to economic, social, and environmental issues but also risks and sustainable development goals.
