Deadline for manuscript
submissions:

10 May 2024

Message from the Guest Editor

Dear Colleagues,

The Special Issue will provide a critical analysis of existing models that make claims for the behaviour of digital currency prices. The most famous example of digital currency is Bitcoin, but there are many other examples and we welcome research on them as well. New models would also be included. Issues related to market structure, such as the introduction of digital currency by central banks and its likely impact on Bitcoin prices, will also be welcome. Whilst the main focus will be on statistical analysis, the SI will be open to research that is broadly in this area.
