Message from the Guest Editors

The importance of the financial and systematic risks management is intensified in the current conditions when the global spread of COVID-19 is affecting the enterprises; knowing how to reduce the accompanying risks is key.

This Special Issue is particularly interested in papers focusing on (1) entrepreneurship in small and medium-sized enterprises; (2) mathematical modeling in economics and management; and (3) impact of COVID-19 on the operation of enterprises.

We invite authors to contribute original research articles in theory, practice, and applications on financial and systematic risks of enterprises with emphasis on the invisible business risks of COVID-19. All submissions must contain original unpublished work not being considered for publication elsewhere.
