Prescient Models LLC, Santa Fe, NM 87505. USA

Deadline for manuscript submissions:

closed (28 February 2022)

# **Message from the Guest Editor**

Dear Colleagues,

The greatest obstacle to widespread adoption of machine learning models in credit risk modelling and loan underwriting is the risk of unintended ethical bias. This is a case of asking the model to do what humans and regulations expect, not what the data reflects. Researchers are exploring ways to modify the data, constrain the algorithms, or alter the modeling process to eliminate these unwanted biases.

For this Special Issue, we invite researchers with novel work into any of these approaches to eliminate bias in the application of machine learning to loan credit risk modeling to submit their papers for consideration. These issues are critical in regulated environments such as lending, but also arise in almost any area where machine learning is applied to human behavior.

## **Message from the Editor-in-Chief**

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, EconBiz, EconLit, RePEc, and other databases. **Journal Rank:** CiteScore - Q2 (*Business, Management and Accounting (miscellaneous)*)
