Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editor

Dear Colleagues,

Volatility modelling is a major topic in empirical finance and financial econometrics research. The key dimensions of volatility modelling include risk management; volatility modelling, including models from the GARCH, realised volatility, and stochastic volatility families; the role of big data and data at different frequencies (daily, intra-day); volatility spillovers; and the behaviour of volatility in crisis periods.

The topics covered in this Special Issue will include but are not limited to:

- Volatility and its role in risk management;
- Estimation of GARCH, realised volatility, and stochastic volatility models;
- The role of big data in volatility estimation;
- Volatility spillovers;
- Volatility and its role in crises and contagion.

Prof. Dr. Robert Brooks

## Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, EconBiz, EconLit, RePEc, and other databases.

**Journal Rank:** CiteScore - Q1 (Business, Management and Accounting (miscellaneous))
