Deadline for manuscript
submissions:

closed (31 March 2023)

Message from the Guest Editor

The mathematical modeling of real-world problems can enhance decision-making capabilities in order to achieve an optimal strategy in a competitive business environment. Generally speaking, the issues of environment and usage of natural resources are extremely significant to reduce environmental pollution, global warming, and unnecessary consumption of limited resources. In this context, environmentally sustainable mathematical modeling can augment the learning and representation of patterns and structure of the data linked with various challenging problems. The idea of green management and operations is to enhance environmental sustainability. Identification, characterization, and business analysis using mathematical models help decision-makers to obtain optimal strategies to tackle complex problems.

This Special Issue searches for challenging applied and methodological papers on this topic and welcomes high-quality submissions by researchers around the world.

an Open Access Journal by MDPI

Guelph, ON N1G2W1, Canada

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, EconBiz, EconLit, RePEc, and other databases.

Journal Rank: CiteScore - Q1 (Business, Management and Accounting (miscellaneous))
