Stock Market Volatility Modelling and Forecasting

Message from the Guest Editor

The determinants of stock return volatility have been investigated for the past two decades. The understanding of stock market volatility is crucial for asset pricing, portfolio management, trading strategy, risk management and capital setting in prudential regulation. In this Special Issue, we are open to theoretical and empirical research on stock market volatility. The deadline for papers is 31 August 2018. Please contact Terence Tai Leung Chong for details.

Keywords

- Nonlinear models for stock market volatility
- GARCH-MIDAS models for stock market volatility
- Effects of Macro-economic variables on stock market volatility

Indexing & Abstracting Services:

Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), EconLit, RePEc, DOAJ and others.

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in Journal of Risk and Financial Management (JRFM), an on-line, open access journal. JRFM adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of JRFM is to enable rapid dissemination of high impact research to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), and ranked B by the ABDC - Australian Business Deans Council external.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 4.3 days (median values for papers published in this journal in the second half of 2018).
