

Special Issue

Regulatory Risk

Message from the Guest Editors

This Special Issue of *JFRM* attempts to deepen our understanding of the impact of regulation on firm-specific policies and aggregate economic activities. We seek research on the heterogenous effect of regulation on corporations, the link between regulation and aggregate economic output, and how firms hedge against regulation risk under various circumstances. We especially encourage research on the effect of regulation conditional on firm-specific characteristics at the micro-level and during different time frames at the macro-level, which may potentially help us reconcile the positive and negative views of regulation on economic development. Both empirical and theoretical studies are welcome, with a preference for the former.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
