

Special Issue

Risk-Informed Decision-Making in Managerial Finance: Insights for an Era of Uncertainty

Message from the Guest Editor

Today's financial leaders are navigating a world defined by uncertainty and complex, interconnected risks. Whether it is deciding where to invest, how to fund operations, or whether to pay out dividends, every choice must account for a wide array of exposures from market volatility and credit issues to new regulatory and ESG pressures. The way a company handles its working capital, the trade credit it offers, the cash buffers it keeps are not just technical choices. They are reflections of the company's appetite for risk, shaped by internal goals and the unpredictable tides of the global economy, policy shifts, and institutional frameworks. This special issue aims to explore this new landscape. We want to bring together diverse viewpoints to build a deeper, more practical understanding of how to make smart financial decisions in a risky world. We welcome all kinds of contributions, from empirical studies to new theories, that shed light on both the timeless and the emerging challenges in finance.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
