

Special Issue

Monetary Policy in a Globalized World

Message from the Guest Editor

Over the past few years, the global economy has been going through the COVID-19 pandemic and the most severe recession since the “Great Depression”. As economies reopened, coupled with the Russia–Ukraine war, inflation rose to rates not seen in four decades for developed countries and since the 1990s in the developing world. This has led to governments and central banks all over the world quickly ratcheting up interest rates, raising questions about the effectiveness and coordination of monetary policies. This Special Issue focuses on some of these key questions, including, but not limited to, novel research on monetary policy uncertainty; effectiveness of monetary policy; spillover effects of inflation; central bank credibility; negative interest rate policies; digital currencies; and monetary policies with which to rebalance the global economy after the COVID-19 pandemic. Both theoretical and empirical research are welcomed, as is the use of novel mathematical/econometric/statistical techniques for these topics.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
