

## Special Issue

# AI and Machine Learning for Credit Risk and Financial Distress Prediction

### Message from the Guest Editors

This Special Issue seeks to bring together high-quality research that explores both methodological innovations and practical implications. We invite contributions from scholars, practitioners, and policymakers that advance the theory, application, and evaluation of AI/ML models in credit scoring, default risk, bankruptcy forecasting, and financial stability analysis. Topics of interest include, but are not limited to:

- Novel AI/ML architectures and hybrid models for predictive analytics in credit risk;
- Integration of macroeconomic, ESG, and alternative data into credit scoring models;
- Explainable and interpretable AI for regulatory compliance and trust in automated systems;
- Comparative analyses of AI/ML versus traditional econometric approaches;
- Ethical, fairness, and policy implications of AI-driven credit decision-making.

We welcome empirical studies, methodological papers, and review articles that bridge finance, data science, and policy research.

---

### Guest Editors

Dr. Mohammad Mahdi Mousavi

School of Management, University of Bradford, Bradford BD7 1DP, UK

Prof. Dr. Jamal Ouenniche

Business School, University of Edinburgh, Edinburgh EH8 9JS, UK

Dr. Stefano Grillini

Morgan Stanely, London E14 4QA, UK

---

### Deadline for manuscript submissions

30 November 2026

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
