

Special Issue

Emerging Technology, Corporate Governance Disclosure and Corporate Social Responsibility

Message from the Guest Editors

In the modern corporate environment, the convergence of emerging technology, corporate governance disclosure and corporate social responsibility (CSR) is significantly transforming organizational practices and stakeholder engagement. Technological advancements, especially in information and communication technologies (ICTs), are revolutionizing the way in which companies disclose governance and CSR activities, thereby enhancing transparency and accountability. These technologies enable real-time, accessible and comprehensive disclosure, providing stakeholders with crucial information for informed decision-making. This Special Issue aims to compile and disseminate pioneering theoretical and empirical research on the interplay between technology, corporate governance disclosure and corporate social responsibility (CSR). We are particularly interested in studies examining the impact of emerging technologies (e.g., artificial intelligence, blockchain, machine learning, big data, decentralized finance, etc.) on corporate governance disclosure and CSR, as well as those exploring the interrelationship between corporate governance disclosure and CSR.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
