

Special Issue

Agricultural Insurance and Risk Management

Message from the Guest Editor

Agricultural producers can apply different strategies for risk management. In many cases, the decision to use insurance as a financing method depends on the farmer's preferences, existing state subsidies, or the compulsion to use specific solutions. However, the dynamics of climate, organizational, and technological changes make it more and more difficult to maintain the stable functioning of farms without any insurance or other tools of financing losses. Therefore, it is necessary to consider how risk management instruments in agriculture should be shaped and the role of insurance. We kindly invite you to submit studies that show practical solutions and theoretical discussions in building risk management tools in agriculture. Technological development and the use of satellite images, high insurance premiums, and farmers' low inclination towards insurance are problems faced by almost all countries. This Special Issue will be a place of wide discussion from different perspectives and will provide a valuable overview of the global experiences of these issues.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
