

## Special Issue

# Asset Price Bubbles, Currency Risks and Financial Crises

### Message from the Guest Editor

The theme of this Special Issue is to investigate how rapid increases in certain assets such as real estate, stocks, bonds, gold, and cryptocurrencies sometimes deflate without any major consequences, while in others, they produce financial crises such as the Global Financial Crisis of 2007–2009. Globalism impacts national economies via currency volatilities. Some papers in this volume can focus on any of these 3 topics or view these issues from the perspective of one country, e.g., US or China, or trace cause and effect among several countries. Some authors may focus on currencies and discuss the future of leading currencies, national monetary and fiscal policies, the welfare issues of the global economy, and policies to address future financial crises.

### Guest Editor

Prof. Dr. Anastasios G. Malliaris

Quinlan School of Business, Loyola University Chicago, Chicago, IL 60611, USA

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
